Dublin, Ireland • 089 407 4368 • saurabhlagad435@gmail.com • linkedin.com/in/saurabh-lagad • Portfolio

PROFESSIONAL SUMMARY

Data Analytics and Business Intelligence professional with 3+ years turning multi-source operational data into actionable insight for senior decision-makers, including experience in energy sector analytics across 150+ UK solar and grid infrastructure sites. Skilled in Power BI (DAX), SQL, Python, and Boomi iPaaS, building dashboards, automating ETL pipelines, and delivering data storytelling across cloud and on-premises environments within structured governance and programme reporting cycles. Previously partnered with Finance and operations leadership at a major UK solar client to identify generation inefficiencies, delivering \$200K+ in quantifiable savings.

TECHNICAL SKILLS

Data Visualization & BI: Power BI, Tableau, Excel (Pivot Tables, DAX, Advanced Excel), BI Dashboards

Programming & Querying: SQL, Python (Pandas, NumPy), R, Snowflake

Statistics & Modelling: Statistical Analysis, Data Modelling, Trend & Pattern Analysis, Forecasting, Anomaly Detection, KPI Tracking, Regression Analysis, SLA Monitoring, Operational Efficiency Metrics

Data Management: Data Gathering, Cleaning & Validation, ETL Pipelines, Data Quality Assurance, Data Governance, Metadata Management, Data Warehousing, Data Lakes

Platforms & Tools: Azure Data Factory, Microsoft Fabric, Boomi iPaaS, JIRA, Azure Boards, SharePoint, SAP, IFS ERP

PROFESSIONAL EXPERIENCE

Data Operations Associate (Business Intelligence Analyst)

Apr 2025 – Present

Biologit Ltd. • Dublin, Ireland

- Led end-to-end delivery of 3+ enterprise report suites, covering platform-wide operations, marketing performance, and financial reporting, building 5+ Power BI dashboards with advanced DAX measures tracking 15+ KPIs across 20+ client portfolios, providing leadership with timely, actionable insight into business performance.
- Gathered, cleaned, and validated multi-source operational datasets using Python (Pandas, NumPy), applying data quality assurance checks to improve pipeline reliability and reduce manual data-preparation effort, enabling faster and more consistent delivery of executive-level reports.
- Developed advanced DAX measures, calculated columns, and Power BI data models to analyse platform-usage, marketing, and financial datasets, surfacing trends, patterns, and anomalies that drove measurable operational efficiency improvements.
- Collaborated with operations, finance, and marketing stakeholders to translate business requirements into BI dashboards and reports, presenting KPI updates and executive-level insights directly to leadership within structured governance and programme reporting cycles.

Associate Data Engineer (Data Analytics)

Nov 2022 – Aug 2024

Onepoint IT Consultancy • India

- Designed and published Power BI dashboards with advanced DAX measures tracking solar KPIs, capacity factor, energy yield, curtailment rates, and grid-export performance, across 150+ PV sites, giving operations and maintenance teams self-service visibility into generation trends.
- Applied time-series analysis and regression modelling to forecast solar energy generation and demand fluctuations, supporting grid dispatch planning and improving energy settlement forecast reliability for the UK client.
- Wrote advanced SQL in Snowflake across a raw-staging-analytical data warehouse and data lake to analyse PV generation data, inverter output, grid-export volumes, and irradiance-adjusted yield, detecting curtailment events and anomalies to accelerate root-cause analysis and reduce maintenance response time.
- Built end-to-end data integration pipelines using Azure Data Factory (ADF), Microsoft Fabric, and Python to ingest SCADA telemetry, inverter logs, and semi-structured grid-export data from a major UK solar client into a Snowflake data warehouse and data lake across cloud and on-premises environments.
- Partnered with Finance and operations leadership to analyse financial and sales datasets using Python and Power BI, identifying generation inefficiencies and cost-reduction opportunities that delivered \$200K+ in quantifiable savings, translating raw data into actionable insight for senior decision-makers.
- Developed ETL pipelines in Boomi iPaaS to automate ingestion, transformation, and data quality assurance of structured and semi-structured generation, metering, and PV performance data, with standardised KPI definitions and metadata management portfolio wide.

EDUCATION

MSc Information Systems

University College Dublin, Ireland • NFQ Level 9 • First-Class Honours (1:1)

Sep 2024 – Sep 2025

B.E. Information Technology

Savitribai Phule Pune University, India • First-Class Honours (1:1)

Jul 2018 – Jun 2022
